Les Jensen's Bio:

Les Jensen has worked with high power energy for 20 years. As a Television Engineer, Les had to master the art of high energy working with High Power Television Transmitters. With so much power, The purity of the energy, the frequency, and the transmitter itself had to all be kept in alignment to be able to pass the energy through to the viewers without an imbalance creating havoc. By working directly with so much energy, Les came to understand the subtle nature of pure energy.

At the same time, Les had some very difficult times in his life. He noticed how immense amount of subconscious energy would rise up when he was having an emotional challenge. By observing the nature of his own energy, Les was able to map the nature of our human experience, both consciously and subconsciously, as a purely energetic point of view. Our Soul, is limitless energy, when we can put ourself into perfect alignment with it, then we can conduit the Light of our Soul into our everyday affairs. Bringing a sense of grace and ease to our life experience. Allowing our Soul to show up directly in our daily affairs. Allowing high power spiritual energy into our Souls intentions for our life.
